LIMITATIONS

Sam Wilson has, in the past, had problems with being programed by the Red Skull. This was a major plot point in the 70's and he has since come to terms with the issue and gotten past it.

EQUIPMENT

ORIGINAL WING-HARNESS

EXCELLENT (20)

- At various stages in his career the Falcon has used different flight harnesses, presented below is the original and the most current as well.
- Before he was given the jetpowered harness by the Black Panther, the Falcon used a simple set of unpowered glider vanes which allowed him to glide at Good speed.

The Falcon wears a jet-powered harness of Wakandan design. While wearing it he is able to fly at Excellent Speed. For short periods (10 rounds maximum) he can fly at Remarkable Speed, but this requires a successful green Endurance FEAT roll because of the strain to his arm muscles and breathing limitations. The Falcon can carry up to 200 pounds in flight, or 400 if he makes a successful Strength FEAT roll, but must keep his arms in an outstretched, rigid position. He can shut off the wing jets and glide at Good speed so as to surprise opponents.

AVENGERS COMMUNICARD

Avengers ID that has microcircuitry that allows:

CONTACTS

THE FALCON WAS A PARTNER OF THE ORIGINAL CAPTAIN AMERICAFOR A TIME AS WELL AS A MEMBER OF THE AVENGERS. THE BLACK PANTHER PROVIDED FALCON WITH HIS WINGS. AS BOTH SAM WILSON

THE FALCONHE HAS WORKED WITH SGT. TORK OF THE NYPD
